Search Dog

Welcome to our new Vizsla Database

We currently have 170311 Vizslas and 7889 Vizslas with picture(s) in the database.

This pedigree database is intended for the community of Hungarian Vizsla and Hungarian Wirehaired Vizsla lovers worldwide. With the help of the community we are trying to gather as much Vizsla heritage and information as possible.

Please see our **Help/Info** page (under the "Info/Contact" menu) for hints and help on how to use the database.

New tools allow you to:

- view pedigrees up to 8 generations
- calculate inbreeding and ancestor loss over 8, 9 or 10 generations.
- view lists of all known ancestors.
- search for dogs by name, registration, date of birth, country of birth health reports, and more.
- view the pedigree of a test mating, and perform inbreeding calculations and analysis over 8, 9 and 10 generations.
- search for a prospective sire or dam and exclude all dogs descended from a dog or bitch that you nominate.

A **simple search** box is available in the top right corner on each screen.

To search for a Vizsla please enter the registered name, or part of the registered name of the dog you wish to look up, **WITHOUT TITLES**, and then hit enter or press the "Search" button.

For example;

"Freddy Dog"

NOT "CH Freddy Dog"

To keep a little control over the dogs in the database only moderators and admins of the website enter information into the database. If you want to have your dog(s) added or update information on existing dogs you can contact us **by email, Facebook**, or fill out the "**submit pedigree**" form.

**Enjoy,
Moderators Vizsla
